Explanation of PCS Rankings

The Postseason Championship Series (PCS) Rankings are computed in an almost identical manner to college football's now-extinct BCS system. The purpose is primarily to entertain, but also to help determine, using all available methods, the rankings of all Indiana high school football teams that participate in the IHSAA postseason playoffs. With a call by many to seed the sectionals, the PCS could be used to help that process.

To derive a team's AP, IFCA and Gridiron Digest Poll percentage, the total points are divided by the total possible points. For the computer rankings, teams are assigned an inverse point total, depending on how many teams are in each class.

The PCS is then separated into four components: the AP poll, IFCA poll, TGD poll and then all others, each worth 1/4 of a team's final ratings average.

To determine the 'All Others' Ratings, we take the Sagarin, Indiana Football Digest & MaxPreps polls. We throw out their lowest score and then average the other two.

Note - Massey ratings are not included due to difficulty of gathering the data.
